

Contribution ID: 149

Type: Oral

Single-electron Capture in slow Collisions of Ne^{9+} with He and H_2

Keywords

charge transfer, differential cross sections, TC-AOCC, COLTRIMS

Topics

Collisions with Electrons, Ions, Atoms and Molecules

Primary author: Dr ZHU, Xiaolong (Institute of Modern Physics, Chinese Academy of Sciences)

Co-authors: Mr XU, Jiawei (Institute of Modern Physics, Chinese Academy of Sciences); Dr FENG, Wentian (Institute of Modern Physics, Chinese Academy of Sciences); Dr LIU, Ling (Institute of Applied Physics and Computational Mathematics, China); Dr GUO, Dalong (Institute of Modern Physics, Chinese Academy of Sciences); Dr GAO, Yong; Prof. ZHANG, Shaofeng (Institute of Modern Physics, Chinese Academy of Sciences); YAN, Shuncheng (Institute of Modern Physics, Chinese Academy of Sciences); Dr QIAN, Dongbin (Institute of Modern Physics, Chinese Academy of Sciences); Dr WU, Yong (Institute of Applied Physics and Computational Mathematics, China); Mrs ZHAO, Dongmei (Institute of Modern Physics, Chinese Academy of Sciences); Prof. WANG, Jianguo (Institute of Applied Physics and Computational Mathematics, China); Prof. MA, Xinwen (Institute of Modern Physics, Chinese Academy of Sciences)

Presenter: Dr ZHU, Xiaolong (Institute of Modern Physics, Chinese Academy of Sciences)
