Type: **Poster**

Shift of electronic levels due to dynamically screened electron magnetic anomaly for systems with supercritical charge

Keywords

dynamically screened AMM,
non-perturbative QED effects,
H-like atoms,
nuclear quasi-molecule,
large Z

Topics

Fundamental Aspects, Structure and Spectroscopy

Primary authors: ROENKO, Artem (Lomonosov Moscow State University, Faculty of Physics); Prof. SVESHNIKOV, Konstantin (Lomonosov Moscow State University, Faculty of Physics)

Presenter: ROENKO, Artem (Lomonosov Moscow State University, Faculty of Physics)
