Multi-Electron Processes In MeV/u Mixed-State C⁴⁺ (1s2, 1s2s 3S) + He Collisions: Comparison Of AOCC Calculations And Experiments

Keywords

high resolution electron spectroscopy
metastable states
Atomic Orbital Coupled Channel (AOCC) calculations
transfer-excitation
double excitation

Topics

Collisions with Electrons, Ions, Atoms and Molecules

Primary authors: Prof. BENIS, Emmanouil (Department of Physics, University of Ioannina, GR 45110 Ioannina, Greece); Prof. DUBOIS, Alain (Sorbonne Université, CNRS, Laboratoire de Chimie Physique–Matière et Rayonnement, Paris, France); Dr GAO, Jun Wen (Institute of Applied Physics and Computational Mathematics, 100088 Beijing, China & Sorbonne Université, CNRS, Laboratoire de Chimie Physique–Matière et Rayonnement, Paris, France); Mr LAOUTARIS, Angelos (Department of Physics, University of Crete, P.O. Box 2208, GR 71003 Heraklion, Greece & Tandem Accelerator Laboratory, INPP, NCSR Demokritos, GR 15310 Ag. Paraskevi, Greece); Mr MADESIS, Ioannis (Department of Physics, University of Crete, P.O. Box 2208, GR 71003 Heraklion, Greece & Tandem Accelerator Laboratory, INPP, NCSR Demokritos, GR 15310 Ag. Paraskevi, Greece); Prof. ZOUROS, Theo (Department of Physics, University of Crete, P.O. Box 2208, GR 71003 Heraklion, Greece & Tandem Accelerator Laboratory, INPP, NCSR Demokritos, GR 15310 Ag. Paraskevi, Greece)

Presenter: Prof. BENIS, Emmanouil (Department of Physics, University of Ioannina, GR 45110 Ioannina, Greece)
